

1963-64
FINAL BUDGET
for THE CASE AMATEUR RADIO CLUB

The Case Amateur Radio Club is a relatively new organization on the campus. We are a separate organization from the old, extinct, radio club. Virtually none of the equipment is left from the old club. The new Club's station was put on the air last semester with equipment supplied by individual members of the club. The station was thus assembled on a temporary basis. The main objective of the club is to assemble a station of club owned gear. This is important to the stability of our organization since all activity of the club is centered around operation of the station.

The two major pieces of equipment in any amateur station are the receiver and the transmitter. Needless to say, good equipment costs money. For this reason we plan to purchase a good receiver this year (since this is the basis of the station) and obtain a club owned transmitter in a subsequent year. The receiver cost is the major item on our budget.

Some of the smaller items on the budget are necessary to the operation of the station. These include the microphone, telegraph key, and coaxial relay. The tools are necessary for the installation and maintenance of the station.

It is with the above idea of assembling a substantial station over a period of years that we respectfully submit this budget.

1962-63 budget:

none

Income:

Dues: 50¢ per month per member

Expenses:

Proposed purchase of new equipment:

Hammerlund HQ-170AC Amateur band receiver with noise silencer and speaker	\$432.45	✓
